MIXES INSTANTLY AND TASTES GREAT IN FOOD & DRINK

Nectar® Medical is a 100% natural protein formula designed to exceed even the most stringent and demanding requirements of the medical community. It is designed around Prominā, a superior-quality whey protein isolate that is known for its utmost purity, unwavering consistency and pleasant taste. Whey protein isolate is considered by many experts to be the single highest-quality source of protein for human nutrition. Its bioavailability is without compare, and its amino acids are utilized more efficiently than any other source of protein.

Because Nectar® Medical has a bland taste and is instantly soluble and dispersible, it can be mixed unnoticeably and easily into nearly any beverage or food item, such as milk, tea, juice, flavored water, cereal, soup, pudding or mashed potatoes. Likewise, Nectar® Medical is an ideal product to be used in tube-feeding applications due to its ease of use and health-promoting benefits.

THE FACTS

WHAT IS NECTAR® MEDICAL? +

WHAT IS WHEY PROTEIN ISOLATE? +

WHAT IS PROMINA™? +

DOES NECTAR® MEDICAL OFFER DISTINCT HEALTH BENEFITS? ×

Absolutely! Whey protein is considered by many experts to be the best protein source available for those with
