OFFICIAL DOCUMENT NO.: **000484**

Mexicali, B.C., March 19, 2019.

RE: As mentioned

C. Héctor Hugo Almanza Reyes.
Legal Representative for Centro Médico
Bariátrico de Tijuana S.C.

Greetings, I address You regarding the document filed with this General Branch Office under my supervision on March 19 of this year, by which you requested information regarding the party you represent, Centro Medico Bariátrico de Tijuana, S.C. and the case file for administrative proceeding of sanitary supervision 18-SS-E-02-TJ-158-C-V:

Regarding your inquiry about if evidence, according to the case file, has been found regarding the existence of nosocomial infection of any kind or of the presence of the *pseudomonas aeruginosa* bacteria in the establishment GRAND VIEW HOSPITAL, I state that according to the samples taken from several surfaces of equipment and furniture in the operating room area, during the inspection visit carried out on December 04, 2018, the State Laboratory of Public Health issued results concluding the absence of the mentioned bacteria.

Regarding the petition to inform if any impediment exists derived from the case file or any other reason for the establishment GRAND VIEW HOSPITAL, to fully practice and provide hospital services, including those of bariatric surgery. I state that on February 25, 2019 a Final Ruling was issued regarding the administrative proceedings initiated for the establishment, having currently concluded the sanitary inspection without the existence of any security measure that impedes providing hospital services.

With nothing further to add, I remain at your service for any questions on the matter.

Sincerely,

[Illegible signature appears]

Dr. Hector Rivera Valenzuela
